

SNS topic creation:

The screenshot shows the AWS Management Console for the 'security-alerst-sns' topic. A green banner at the top indicates 'Topic security-alerst-sns created successfully. You can create subscriptions and send messages to them from this topic.' The left sidebar shows the 'Amazon SNS' navigation menu with options for Dashboard, Topics, Subscriptions, and Mobile. The main content area displays the 'security-alerst-sns' topic details, including its Name, ARN, Display name, and Type. Below the details, there are tabs for Subscriptions, Access policy, Delivery policy (HTTP/S), Delivery status logging, Encryption, Tags, and Integrations. The 'Subscriptions' tab is active, showing a table with columns for ID, Endpoint, Status, and Protocol. A message states 'No subscriptions found. You don't have any subscriptions to this topic.' and a 'Create subscription' button is visible.

Subscription confirmation:

The screenshot shows a Gmail inbox with an email from 'AWS Notifications' titled 'AWS Notification - Subscription Confirmation'. The email content states: 'You have chosen to subscribe to the topic: arn:aws:sns:eu-north-1:303133006651:security-alerst-sns. To confirm this subscription, click or visit the link below (If this was in error no action is necessary): Confirm subscription'. Below the text is a 'Confirm subscription' link. At the bottom of the email, there is a note: 'Please do not reply directly to this email. If you wish to remove yourself from receiving all future SNS subscription confirmation requests please send an email to sns-opt-out'. The email is dated '1:23 PM (1 minute ago)'. The Gmail interface includes a search bar, a left sidebar with navigation options like Compose, Inbox, Starred, Snoozed, Sent, Drafts, Purchases, and More, and a right sidebar with various icons. A notification bar at the bottom of the Gmail window says 'Enable desktop notifications for Gmail. OK No thanks X'.

Alarm created:

The screenshot shows the AWS CloudWatch Alarms console. A green banner at the top indicates "Successfully created alarm EC2-CPU-spike." with a "View alarm" button. The left sidebar shows the navigation menu with "Alarms" selected. The main content area shows the "Alarms (1)" list with a table containing one alarm: "EC2-CPU-spike". The alarm is in the "Insufficient data" state, with "Actions enabled". The conditions are "CPUUtilization > 70 for 1 datapoints within 5 minutes".

Alarm generated when threshold exceeds:

The screenshot shows a Gmail inbox with an email from "sns-testing" (no-reply@sns.amazonaws.com) titled "ALARM: 'low-spike-alarm' in EU (Stockholm)". The email body states: "You are receiving this email because your Amazon CloudWatch Alarm 'low-spike-alarm' in the EU (Stockholm) region has entered the ALARM state, because 'Threshold Crossed: 1 out of the last 1 datapoints [49.76749612493542 (16/05/26 08:06:00)] was greater than the threshold (30.0) (minimum 1 datapoint for OK -> ALARM transition)' at 'Saturday 16 May, 2026 08:11:06 UTC'." It includes a link to view the alarm in the AWS Management Console and details about the alarm configuration, including the name, description, state change, reason for state change, timestamp, AWS account, and alarm ARN.

The screenshot shows the AWS CloudWatch Overview dashboard. The left sidebar shows the navigation menu with "Alarms" selected. The main content area shows the "Overview" tab with a summary of services and alarms. The "Services" section shows "EC2" with 1 alarm in the "In alarm" state. The "Recent alarms" section shows two alarms: "low-spike-alarm" and "EC2-CPU-spike". The "low-spike-alarm" is in the "In alarm" state, and the "EC2-CPU-spike" is in the "Insufficient data" state. The dashboard also includes a "Default Dashboard" section and an "Application Insights" section.
