

Understanding the log events from cloud trail:

The screenshot shows the AWS CloudTrail console's 'Event history' page. The left sidebar contains navigation links for CloudTrail, Dashboard, Event coverage, Event history (selected), Insights, Trails, Lake, Dashboards, Query, Event data stores, Integrations, Settings, Pricing, Documentation, Forums, and FAQs. The main content area displays a table of events. A blue banner at the top states: 'AWS CloudTrail Lake feature will no longer be open to new customers starting on May 31, 2026. For capabilities similar to AWS CloudTrail Lake feature explore Amazon CloudWatch. Learn more'. Below the banner, the 'Event history (50+)' section includes a search bar, a 'Read-only' filter, and a 'Filter by date and time' button. The table lists events with columns for Event name, Event time, User name, Event source, Resource type, and Resource name. The events shown are related to the 'stock-market-predictions' and 'anish-lab-bucket' resources. The bottom of the page shows '0 / 5 events selected'.

Creating and deleting custom test bucket to check the logs activity:

The screenshot shows the AWS CloudTrail console's 'Event history' page, similar to the previous one. The left sidebar is the same. The main content area displays a table of events. A blue banner at the top states: 'AWS CloudTrail Lake feature will no longer be open to new customers starting on May 31, 2026. For capabilities similar to AWS CloudTrail Lake feature explore Amazon CloudWatch. Learn more'. Below the banner, the 'Event history (50+)' section includes a search bar, a 'Read-only' filter, and a 'Filter by date and time' button. The table lists events with columns for Event name, Event time, User name, Event source, Resource type, and Resource name. The events shown are related to the 'testbucket-cloudtraillogs' resource. The bottom of the page shows '0 / 5 events selected'.

Event name	Event time	User name	Event source	Resource type	Resource name
DeleteBucket	May 15, 2026, 12:31:19 (UTC+0...)	root	s3.amazonaws.com	AWS::S3::Bucket	testbucket-cloudtraillogs
